Hello Kelly:

According to 25 Pa Code 287.1, the definition of *PCB-containing waste* is—Solid waste containing PCBs in the following concentrations:

- (i) More than 4 parts per million, but less than 50 parts per million.
- (ii) 50 parts per million or more, if the following are met:
 - (A) Regulations promulgated under the Toxic Substances Control Act (15 U.S.C.A. § § 2601—2629) provide that the waste may be disposed of as municipal solid waste.
 - (B) The waste is not a hazardous waste under the act.
 - (C) The Resource Conservation and Recovery Act (42 U.S.C.A. § § 6901—6991) does not impose specific standards or requirements for the disposal of the waste.

Clean and Regulated Fill list individual limits for PCBs as shown in the attachments to this e-mail. These limits are cumulative.

The permits for GROWS North, Fairless, and Tullytown Landfills allow residual wastes containing PCBs < 50 ppm, these are classified as Residual Waste Code 502 - PCB containing wastes. Recent EPA changes concerning Bulk PCBs wastes (> 50 ppm) were also included in these permits.

The Southeast Regional Office does not have any current facility operating under GP #WMGR096, see attached files for more details. However, the region had approved several permits in the past, but they are all inactive. See the list below:

Permit ID Number	Facility Name
WMGR096SE001	GE BETZ TREVOSE FAC
WMGR096SE002	BYBERRY STATE HOSP DEMOLITION
WMGR096SE003	CLOUD LDFL
WMGR096SE005	269 CANAL RD SITE
WMGR096SE007	FAIRLESS LNDFL (under review By DEP)

Subject: GROWS landfills - North and Tullytown

Hi Ramesh - I am seeking information on whether either of these landfills have been permitted by PADEP to accept residual waste/regulated fill containing any concentration of PCBs above 1 ppm.

I am also seeking a list of sites located in the Southeastern PADEP regional office area that have been issued a site specific beneficial use permit under the auspices of WMGR096 that allows the acceptance of residual waste/regulated fill containing any concentration of PCBs above 1 ppm.

Thank you for your assistance.
